ABOUT THE UKSTT

UKSTT was formed in 1993 and incorporated the existing UK based members of ISTT.

The International Society for Trenchless Technology, ISTT, was formed in 1986 but since that time has promoted the formation of National Societies in many different countries. The formation of these National Societies helped to give the local members a sense of identity and autonomy to pursue their own ideas.

UKSTT is structured as a company limited by guarantee where its elected Council members act as directors and guarantors. UKSTT set out its aims and objectives in much the same way as the International Society but with more emphasis on the exchange and networking of information and ideas throughout the UK utility industry.
